EXPERIENCE

Software Engineer @ TA Digital

June 2021 - Present => Gurugram

- Got to work on VueJS Framework, code structure and setup process of the Product Retail website.
- Participated in regular Sprints and daily Scrum meetings with the AEM CMS developers in order to understand the process and project line ups.
- Actively participating in trainings, co-curricular activities managed by the organization in order to create a friendly and healthy environment in the organization.
- Resolved issues assigned tickets to the FED team along with AEM developers.

Front-end Web Developer @ Sparklin Innovations

May 2020 - June 2021=> New Delhi

- Worked on Angular Framework based projects like ICICI banking, Openvy.
- Leading a team of four in ICICI banking project incorporating various trending third party libraries in conjunction with the Backend Team at Infosys. Worked over all adaptive responsive scenarios of modules and in-flows while integrating Bootstrap infused front-end with successive resolutions to the Backend team members over calls and emails.
- Resolved daily scrum/issue calls with the Infosys Backend Team. Directed on-time UX Tech code deliveries to the Backend team accomplishing the tasks before deadlines and promoting swiftness while working under crunched Sprints.
- Worked on Unified Journey in ICICI Retail Internet Banking Project, monitoring pages in cohesion with the Backend team members.
- Worked on the Proprietary website of the company using languages like HTML5, Javascript, CSS3. Achieved all browser interaction requirements.

PROJECTS

Hyundai USA Retail — Consumer Retail Website

Vue based front-end platform for Hyundai customer and users. This platform is a proprietary hub for shopping vehicles, insurance, maintenance and knowledge on Hyundai USA products.

ICICI Banking — Bank User Dashboard

Angular based, library infused, front-end Dashboard for ICICI bank users. The platform acts as a premium primary banking dashboard for every ICICI bank customer with an ICICI bank account.

Openvy — Social Media Platform

Angular based social media platform for users to collaborate and communicate using loops like retweets. Openvy connects every individual in a creative field to their equally creative counterparts.

Booking Platform — Luvstay Proprietary Website

The project required rebranding their online portal with an overhauled information architecture and a cosmetic makeover from the brand logo to the illustrations. Front-end hotel room booking portal over PHP language and bootstrap library. The platform allows easy booking of hotel

Web Developer @ Luvstay

Dec 2019 – 2020 May => New Delhi

- Integrated the proposed front-end platform collaborating closely with backend team members.
- Worked over the customer review management system on the platform using PHP (CodeIgniter) and Bootstrap.

Web Designer @ Luvstay

Nov 2017 – Nov 2019 => New Delhi

- Worked on redesigning the Information architecture of the entire website to cater to the end user needs.
- Conducted online surveys with target demographics to understand the problems and pain points of the end user on the existing platform. Researched over proprietary solutions with BoD in regular meetings.
- Implemented design mock-ups and design changes on the website, using designing tools such as Adobe Sketch, Figma while creating prototypes and wireframes for a cosmetic haul of the existing platform.
- Generated a bigger user base after deployment of the changed website with features. Achieved larger traffic after developing a new user experience on the platform.
- Implemented several media campaign assets with team members using design and development tools. Took part in campaigns related to brand popularity enhancement or product advertisement. Developed several successive use cases on the proprietary website in order to generate least clicks per user per process of booking.

Product Design Intern @ HeavensBowl

May 2017 – Oct 2017 => New Delhi

- Researched and optimized the information architecture of the product packaging and adjusted packaging artworks.
- Actively took part in board meetings to understand, ideate and present solutions for the food tray packaging.
- Created high fidelity mockups with Adobe photoshop and Adobe Illustrator.
- Performed online surveys and guerrilla usability testing to record responses and to understand user pain points. Presented the responses and proposed design report to the bench.
- Maintained and designed the in-house website assets on Adobe Illustrator and Sketch.

rooms for millennial couples with easy check-in facilities.

HeavensBowl — Healthy Meal Subscription

The project requirements included restructuring of the information architecture on the food tray packaging sleeves with contributions in designing visual illustrations. The firm promotes a healthy eating lifestyle, with subscription plans for customers, by distributing ready-to-eat food trays.
