EXPERIENCE

Software Engineer @ TA Digital

June 2021 - Present, Gurugram

- Got to work on VueJS Framework, code structure and setup process of the Product Retail website.
- Participated in regular Sprints and daily Scrum meetings with the AEM CMS developers in order to understand the process and project line ups.

Front-end Web Developer @ Sparklin Innovations

May 2020 - June 2021, New Delhi

- Worked on Angular Framework based projects like ICICI banking, Openvy.
- Leading a team of four in ICICI banking project incorporating various trending third party libraries in conjunction with the Backend Team at Infosys. Worked over all adaptive responsive scenarios of modules and in-flows while integrating Bootstrap infused front-end with successive resolutions to the Backend team members over calls and emails.

Web Developer @ Luvstay

Dec 2019 - 2020 May, New Delhi

- Worked over the customer review management system on the platform using PHP (CodeIgniter) and Bootstrap. Integrated the proposed front-end platform collaborating closely with backend team members.

Web Designer @ Luvstay

Nov 2017 - Nov 2019, New Delhi

- Worked on redesigning the Information architecture of the entire website to cater to the end user needs.
- Conducted online surveys with target demographics to understand the problems and pain points of the end user on the existing platform.
- Implemented design mock-ups, through tools such as Adobe Sketch, Figma while creating prototypes and wireframes for a cosmetic haul of the existing platform.
